

**Obstructive Sleep Apnea**

Obstructive Sleep Apnea is a major health problem that may be life threatening or contribute significantly to other health risks including obesity, hypertension, diabetes with poor blood sugar control, heart attacks, strokes, acid reflux, and grinding of teeth (bruxism). It also is a major contributing factor to many vehicle related accidents and deaths. Its major symptoms include snoring, pauses in breathing while asleep, urinating more than one time per night, daytime fatigue / sleepiness, depression and erectile dysfunction. Treatment is effective and helps prevent many of these risks.

Circle One

<b>S</b>	Do you <b>S</b> nore loudly? <i>Ronca ruidosamente?</i>	Yes	No
<b>T</b>	Do you often feel <b>T</b> ired, fatigued, or sleepy during daytime? <i>A menudo se siente, cansado o con sueño durante el día?</i>	Yes	No
